CAPE TOWN

OLY STOOL

The Oly stool is an exercise in apparent simplicity and visual asymmetry. It provides economical seating for homes and cafés and doubles up as a side table. The Oly Stool is the hub of the 3 Range and gives impetus to the products that follow. The characteristic single leg is mimicked in the complex curves of the double leg. The legs are riveted together at the base and welded to a hoop to which the 3 part wooden seat is attached.
